EDUCATION

AISSMS College of Engineering <i>B.E. in Robotics and Automation – CGPA: 7.8/10</i>	Pune, Maharashtra 2024 – 2028
Rajiv Gandhi Academy of E-Learning School & Jr. College <i>Higher Secondary Certificate (HSC) – 57.50%</i>	Pune, Maharashtra 2022 – 2024
Kendriya Vidyalaya DIAT <i>Secondary School Certificate (SSC) – 73.6%</i>	Pune, Maharashtra 2022

PROJECTS

- ApexTracker AI – Expense Tracker with Analytics** | *React, TypeScript, Node.js, Express, PostgreSQL, Prisma*
- Developed a full-stack personal finance platform for tracking expenses, income, budgets, savings goals, and custom categories.
 - Implemented JWT-based authentication with refresh-token rotation, secure password hashing, and validated REST APIs using Express and Prisma.
 - Built interactive financial dashboards with Recharts and integrated Google Generative AI for personalized financial insights.
 - Added PDF financial reports, receipt uploads, and Swagger/OpenAPI documentation for improved usability and API accessibility.
- ResQAI – AI Resume Analyzer & ATS Optimizer** | *React, Python, FastAPI, Google Gemini, SQLAlchemy, SQLite*
- Developed a full-stack AI-powered application that parses PDF resumes and analyzes them against target job descriptions.
 - Implemented ATS suitability scoring, keyword-gap analysis, and AI-generated resume improvement recommendations using Google Gemini.
 - Built secure authentication and database-backed resume management using FastAPI, PyJWT, SQLAlchemy, and SQLite.
 - Developed an interactive analytics dashboard using React and Tailwind CSS to visualize resume analysis results.
- ChefPulse – AI-Powered Restaurant Management System** | *React, FastAPI, Python, SQLite, WebSockets*
- Developed a full-stack restaurant management platform integrating orders, reservations, menus, inventory, customers, and analytics.
 - Implemented AI-powered assistants for food recommendations, operational insights, demand forecasting, and inventory recommendations.
 - Built role-based dashboards with JWT authentication and real-time WebSocket notifications for orders and reservations.
 - Integrated voice ordering and image-based dish recognition to enhance customer interaction and restaurant operations.

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, JavaScript
Frontend: HTML, CSS
Backend: FastAPI, REST APIs
Developer Tools: Git, GitHub, VS Code, Eclipse IDE, MySQL Workbench, Jupyter Notebook, Canva
Libraries & APIs: Pandas, Scikit-learn, TextBlob, Requests

CERTIFICATIONS

- **CSS with AI** – Unstop
- **Node.js** – Unstop
- **Advanced Software Engineering Job Simulation** – Walmart, Forage
